

Microsoft Azure Certification BootCamp for AZ-104 (Microsoft Azure Administrator Associate)

Duration: 4 Days

DESCRIPTION

This BootCamp course is for the new role-based AZ-104 exam targeted for Azure Administrators. Taking this course and passing the exam will meet all of the requirements for Microsoft Certified Azure Administrator Associate Certification.

This BootCamp teaches IT Professionals how to manage their Azure subscriptions, secure identities, administer the infrastructure, configure virtual networking, connect Azure and on-premises sites, manage network traffic, implement storage solutions, create and scale virtual machines, implement web apps and containers, back up and share data and monitor your solution.

The Azure Administrator implements, manages and monitors identity, governance, storage, compute, and virtual networks in a cloud environment. The Azure Administrator will provision, size, monitor, and adjust resources as appropriate.

OBJECTIVES

- After successful completion of this BootCamp candidates will be able to:
- Manage Azure identities and governance
 - Implement and manage storage
 - Deploy and manage Azure compute resources
 - Configure and manage virtual networking
 - Monitor and back up Azure resources

COURSE OUTLINE

- **Module 1: Identity**
- **Module 2: Governance and Compliance**
- **Module 3: Azure Administration**
- **Module 4: Virtual Networking**
- **Module 5: Intersite Connectivity**
- **Module 6: Network Traffic Management**
- **Module 7: Azure Storage**
- **Module 8: Azure Virtual Machines**
- **Module 9: Serverless Computing**
- **Module 10: Data Protection**
- **Module 11: Monitoring**

WHO SHOULD ATTEND

- IT Professionals
- Future & Current Azure Administrators

PREREQUISITES

Should have an understanding of the following:

- On-premises virtualization technologies, including VMs, virtual networking, and virtual hard disks
- Network configuration, including TCP/IP, Domain Name System (DNS), virtual private networks (VPNs), firewalls, and encryption technologies
- Active Directory concepts, including domains, forests, domain controllers, replication, Kerberos protocol, and Lightweight Directory Access Protocol (LDAP)
- Resilience and disaster recovery, including backup and restore operations

TESTIMONIALS

- “ Very impressive training, this will certainly help my team to upgrade the skill in Azure. I would definitely recommend this training as a good kick start for Azure learning. A trainer is very knowledgeable having great command over the subject. **- Anil V (Associate Manager, Stryker)** ”
- “ It was really an excellent learning experience for AZ-103. The trainer was very much experienced and he cleared all our doubts with proper examples. **- Ajith N (Senior Software Engineer, Cerner Healthcare India)** ”
- “ Excellent training, excellent material and extremely well conducted and coordinated by the trainer. The pace was great and the presentation and training skills of the trainer were also great. **- Chandrasekar R (Sr. Consultant, HCL Technologies)** ”
