

Microsoft Azure Certification BootCamp for Exam AZ-220 (IoT Developer)

Duration: 4 Days

DESCRIPTION

This course provides students with the skills and knowledge required to successfully create and maintain the Cloud and edge portions of an Azure IoT solution. The course includes full coverage of the core Azure IoT services such as IoT Hub, Device Provisioning Services, Azure Stream Analytics, Time Series Insights and more. In addition to the focus on Azure PaaS services, the course includes sections on IoT Edge, device management, monitoring and troubleshooting, security concerns and Azure IoT Central.

OBJECTIVES

After completing this course, students will be able to:

- Create, configure and manage an Azure IoT hub
- Provision devices by using IoT Hub and DPS, including provisioning at scale
- Establish secure 2-way communication between devices and IoT Hub
- Implement message processing by using IoT Hub routing and Azure Stream Analytics
- Configure the connection to Time Series Insights and support business integration requirements
- Implement IoT Edge scenarios using marketplace modules and various edge gateway patterns
- Implement IoT Edge scenarios that require developing and deploying custom modules and containers
- Implement device management using device twins and direct methods
- Implement solution monitoring, logging and diagnostics testing
- Recognize and address security concerns and implement Azure Security Center for IoT
- Build an IoT Solution by using Azure IoT Central and recognize SaaS opportunities for IoT

COURSE OUTLINE

- **Module 1: Introduction to IoT and Azure IoT Services**
- **Module 2: Devices and Device Communication**
- **Module 3: Device Provisioning at Scale**
- **Module 4: Message Processing and Analytics**
- **Module 5: Insights and Business Integration**
- **Module 6: Azure IoT Edge Deployment Process**
- **Module 7: Azure IoT Edge Modules and Containers**
- **Module 8: Device Management**
- **Module 9: Solution Testing, Diagnostics, and Logging**
- **Module 10: Azure Security Center and IoT Security Considerations**
- **Module 11: Build an IoT Solution with IoT Central**

WHO SHOULD ATTEND

An Azure IoT Developer is responsible for implementing and then maintaining the Cloud and edge portions of an Azure IoT solution. In addition to configuring and maintaining devices by using Azure IoT services and other Microsoft tools, the IoT Developer also sets up the physical devices and is responsible for maintaining the devices throughout the life cycle. The IoT Developer implements designs for IoT solutions, including device topology, connectivity, debugging and security. For Edge device scenarios, the IoT Developer also deploys compute/containers and configures device networking, which could include various edge gateway implementations. The IoT Developer implements designs for solutions to manage data pipelines, including monitoring and data transformation as it relates to IoT. The IoT Developer works with data engineers and other stakeholders to ensure successful business integration.

PREREQUISITES

IoT Developers should have a good understanding of Azure services, including data storage options, data analysis, data processing, and the Azure IoT PaaS versus SaaS options. IoT Developers should have basic programming skills in at least one Azure-supported language, including C#, Node.js, C, Python, or Java.

Software Development Experience: Software development experience is a prerequisite for this course, but no specific software language is required, and the experience does not need to be at a professional level.

Data Processing Experience: General understanding of data storage and data processing is recommended but not required.

Cloud Solution Awareness: Students should have a basic understanding of PaaS, SaaS, and IaaS implementations. Microsoft Azure Fundamentals (AZ-900), or equivalent skills, is recommended.

TESTIMONIALS

- “ Best training center to learn AWS Cloud Computing Services in India. Training was excellent and trainer has good knowledge about the real world market and used these cases to explain the course content. ”
- **Santosh (NOC Lead, CA Technologies)**
- “ Good faculty, great atmosphere, great examples, made my life easier. Wish to advice friends & colleagues to join CloudThat. Great going, keep up the good work. Wish you a great success. ”
- **Veerendra (Assistant Manager, Accenture)**
- “ Excellent training, there were lot of things to learn even for experienced AWS user. Trainer has very good knowledge and was able to explain real scenarios which were very good. ”
- **Srinivasa Rao (Technical Manager, Samsung Research India Bangalore)**
